

Practical Task 1

I'm currently learning a lot about coding and data science through the HyperionDev Bootcamp. I've got the basics of Python under my belt and I'm getting the hang of data visualisation and tools like Jupyter and Anaconda, which are great for analysing data.

After the bootcamp, I plan to explore a mix of starting my own business and taking on freelance work. I've already started applying what I've learned by working with DataAnnotation.Tech, where I earn \$40 an hour. It's a good start, but I'm looking to expand my horizons.

I'm thinking about launching a startup that provides AI solutions to businesses or beefing up my freelance portfolio with bigger projects. There's a huge opportunity to use AI to help businesses make smarter decisions or streamline operations. With the skills I'm acquiring, I'm eager to tackle these opportunities.

I'm also considering internships at leading AI companies like Surge AI, OpenAI, and Google's DeepMind. It could be a great way to apply my skills in a cutting-edge environment, network with experts, and potentially open doors for my projects.

In short, the HyperionDev Bootcamp is giving me a strong foundation in tech. I'm excited about the possibilities—whether it's launching my venture, landing exciting freelance projects, or working with top AI firms. My goal is to keep building on what I learn and to use technology to address real-world challenges.

Practical Task 2

I have applied for junior jobs with a number of companies via LinkedIn. I have also applied for an apprenticeship. I provide evidence as follows:

The screenshot shows a LinkedIn job application confirmation page. The top navigation bar includes the LinkedIn logo, a search bar with "junior data scientist" and "United Kingdom", and various filters like "Jobs", "Date posted", "Experience level", "Salary", "Company", "Remote", "Easy Apply", and "All filters". The main content area is divided into two columns. The left column lists search results for "Junior Data Scientist" in the United Kingdom, showing three results: one from "Theia Insights" (Cambridge, England, United Kingdom (Hybrid)), one from "Theia Insights" (Cambridge, England, United Kingdom (Hybrid)), and one from "DigitalGenius" (United Kingdom (Remote)). The right column displays the details for the selected job at Theia Insights, including the salary range (£40,000/yr - £50,000/yr), job type (Hybrid, Full-time, Entry level), and skills (Python, Natural Language Processing). Below the job details is a section for "Meet the hiring team" featuring James Thorne, Chief Technology Officer at Theia Insights. A modal window is overlaid on the page, displaying a green checkmark and the message: "Your application was sent to Theia Insights! You can keep track of your application in the 'Applied' tab of My Jobs. Next, verify to improve your chances of getting noticed. Verified members get 13% more recruiter InMails on average. Learn more. Get verified for free".

LinkedIn job application confirmation page for a Junior Data Scientist position at Theia Insights.

The page shows the job details, including the salary range (£40,000/yr - £50,000/yr), job type (Hybrid, Full-time, Entry level), and skills (Python, Natural Language Processing).
